

PATROLEYES

This is quick guide show the easy to use and benefits of this **web redaction** tool.

Below are easy to follow instructions to take advantage of this tool:

To Upload:

1. Upload video by following instructions on the Upload Video tab.
2. Find the video in the 'Videos' tab and click the 'Redact' button to launch video into player.

To Redact:

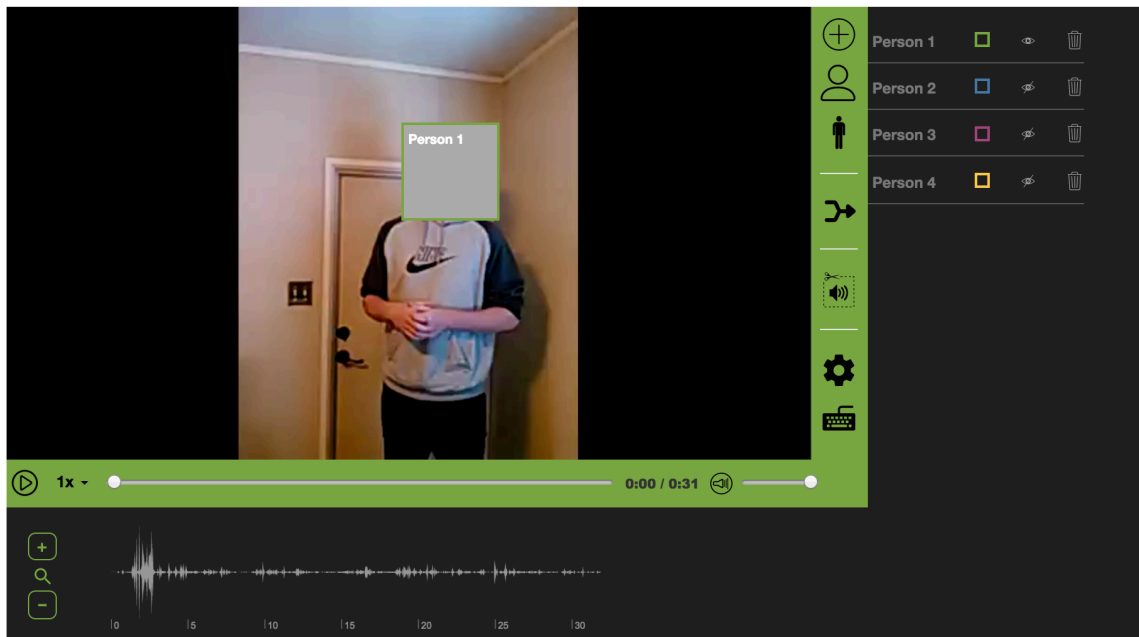

1. Auto Face detection will initialize on the video once you press/click the Face Button to detect all faces in the video.

a) This will detect an entire body if you opt to do so

2. Try key-stepping with keyboard short-cuts.

1. a) Use **D** and **F** keys to go back and forth one frame.

2. b) Use the numbers 1 and numbers 2 on keyboard to play the video at .25 speed and .5 speed.

3. Audio is overlaid with red markers, drag and drop from audio button. Put these markers across the audio bar below the video to mute parts of a video.
4. To generate a final redacted video, push 'Save' button. Wait for the progress bar to complete above the video and go to the next page.
5. Once the final video has been generated, you can download by clicking the save button.
6. To extend an object's path, click the eye open, next to the trash can, when it is closed for a frame. Then key-step forward.
7. To delete an object path, push the trash can button
8. To mark out a random object, eg sign on building, credit card, or similar, push the plus button and draw a path to mark out anything.
